

coinbird Whitepaper

ABSTRACT

The purpose of this paper is to introduce the reader to the coinbird protocol and offer them a brief overview of the BIRD cryptocurrency.

MAIN PAPER

What is the coinbird?

The coinbird is a unique protocol but also an ERC20 token that was deployed on ethereum on September 13th 2022. Conceptualized and developed over the course of few months by "Gustav the coinbird", the token is a simple cryptocurrency that adheres to the latest ERC20 standards and was stripped away of any complex or unnecessary architectures with the intent of making it an easy to trade cryptocurrency without heavy taxation. The deployed code is exactly 200 lines long and can publicly be viewed at:

<https://github.com/coinbirdtoken/Cryptocurrency>

The protocol is ever-growing but the principles that govern each aspect of it are fairly straightforward: simplicity in the written code and thorough transparency along the way.

What is unique about the coinbird cryptocurrency?

We have done everything in our power to make this an easy to trade cryptocurrency by only bounding each trade to very low fees (1%, unmodifiable) and also as decentralized and safe as we possibly can. For that reason, we have included no ownership, granted no special rights to anyone, BIRD didn't go through a presale but was launched stealthily and we burnt all the liquidity that we initially provided. But please, don't just take our word for it. Go through all the documents and the ether-scan transactions that have been made publicly available either on the website and on the coinbird twitter and check the reports/posts for yourselves.

What about the NFT ART?

We are creating a vast collection of unique paintings for the coinbird ecosystem together with artists from all over the world to cover a wide variety of styles. This is another long and tedious process since each painting goes through the following stages: conception, sketch, painting, post processing and a lot of erase and redo. You can view the art on <https://opensea.io/collection/coinbirdgustav-collection>

What are the future plans of the coinbird?

Please go through our roadmap paper to see the tasks that we are currently working on and the goals that we have set forth for the coinbird in the near future.

Do you have any questions or remarks?

If so, feel free to contact the coinbird directly at gustav@coinbird.io - we would be happy to address any questions or concerns you might have.

CONCLUSION
